Detail-oriented and passionate Android Developer with 2 years of hands-on experience in designing, developing, and deploying scalable mobile applications. Proficient in Kotlin, and modern Android frameworks including Jetpack components, MVVM architecture, and Firebase integration. Known for writing clean, maintainable code and delivering user-centric solutions. Motivated to contribute to challenging mobile projects that make a real world impact.

EXPERIENCE

Feb-2024 - Present

Junior Android Developer

Milespeak Technologies

- Built and maintained customer-facing Android apps using Kotlin and XML layouts, following MVVM architecture and Jetpack best practices.
- Integrated Firebase Cloud Messaging for push notifications and Firebase Analytics for tracking user events.
- Handled complete Play Store Submission including signed AAB generation, release track setup, and store listing content.
- Collaborate closely with UI/UX designers, QA engineers, and backend teams in an Agile development environment.

PROJECT

JUSRIDE - [A Cyclist app for commuting rides, service bookings, community engagement]

Tech Stack - [Kotlin, XML, MVVM, Firebase (Auth, Messaging, Analytics), Bitbucket]

- Developed core features including ride booking, driver tracking, and push-notification-based ride-status updates
- Implemented a modular architecture for easy customization of white-label versions using build variants
- Added deep-link support for Firebase push notifications to navigate users directly to in-app ride details
- Set up custom event tracking with Firebase Analytics to monitor booking funnels and retention metrics
- Uploaded signed AAB builds to the Play Console and managed production release with zero crash reports.
- Used Bitbucket for source control and configured CI pipelines for automated testing and release deployment
